DIRECT-IMPORT

THE WHOLE WORLD OF POSSIBILITIES

Nestler-matho®

You have an idea for your unusual advertising project? Or none at all? Get in touch with us! Our creative specialists will turn a vague idea into a tangible product.

In our global network, we find the right partner for the implementation, always keeping your quality, price and time requirements in mind.

Every product we develop with you complies with the latest standards. Tested and safe. Sustainably long-lasting, climate-neutral and made by people for people. This is guaranteed by our cooperation with AMFORI- BSCI-certified companies.

You don't buy a pig in a poke: before production, you hold a functional sample or prototype in your hand for approval.

Sit back and relax! We import your product and take care of delivery, storage or individual shipping.

Here's the first step for „Wow!“ experiences: **Contact us!** Personal, relaxed and fast via directimport@nestler-matho.de

Orchard meadows protect

Over the centuries, more than 6000 fruit varieties have been developed throughout Europe. Today, extensive orchards with high trunks is a counter-model to the monoculture of plantation farming. The absence of pesticides and synthetic fertilisers also preserves the richness of flora and fauna: meadow orchards can be home to 2000 to 5000 animal species. Have we aroused your interest and would you like to become active in the preservation of the cultural landscape yourself? Search the internet for local projects, your help is welcome!

From the sales price we donate € 0.50

to the orchard project **OBSTGUT LEISBERG**, where many volunteers take care of the traditional cultural landscape and biodiversity.

FINISHING POSSIBILITIES AND TIPS

We can finish your products effectively with special lacquers and other finishing techniques to effectively in the limelight.

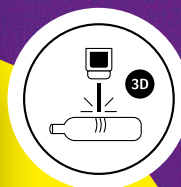

LASER ENGRAVING

SCREEN PRINTING

DIGITAL ROTARY PRINTING

3D ENGRAVING

AUSZUG AUS UNSEREN VEREDELUNGSMÖGLICHKEITEN

Laser engraving

Laser engraving with CO2 laser machines from Trotec. We use the fastest laser engraving machines on the market to significantly reduce delivery times. significantly.

3D engraving

Our Blue Line fibre lasers facilitate 3D engraving of large-area motifs on round bodies. We can therefore engrave workpieces with complex shapes on various levels, as well as bevels and curved contours for you without any significant distortions.

Digital rotary printing

The latest generation of digital LED UV rotary printing facilitates large-format printing on bottles and glasses, as well as full-circumference rotary printing.

Embossing

Deep and relief embossing produces fantastic results on leather, soft plastics and cardboard covers. Embossing can be performed blind or with a background colour. The option to emboss individual names using font suitcases is a special feature. This makes products unique and individual.

Digital printing

Digital technology is increasingly being used for printing small volumes and for motifs with colour gradients. The higher per unit printing costs are largely compensated by the lower preprinting costs here.

Pad printing

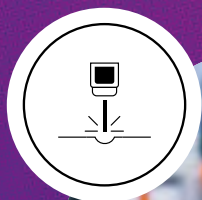

Pad printing is so precise that even the smallest fonts and contours can be produced with an excellent finish. We implement up to 6-colour solid colour motifs for you. A large number of basic colours is available, so we can mix any colour value based on RAL, HKS or Pantone specifications.

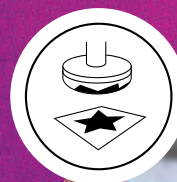

Do you have any questions about other finishing options? We are here to answer all your questions, advise you without obligation and help you make the right decision! Call us at **+49(0)7221-2154-0**.
